Dieline Genius™ Mac & Windows

2D Desktop

**Easily customize packaging and point-of purchase display designs—no experience necessary.**

Dieline Genius 2D Desktop lets anyone quickly create corrugated and folding carton material structures from a library of proven professional designs. It offers a:

- Library of over 500 parametric designs
- 2D PDF and other exports

It's easy to use, even for those without packaging and display design experience.

Open the Dieline Genius 2D Desktop library. From the library's tree structure select one of the 500+ designs for packaging or point-of-purchase displays.
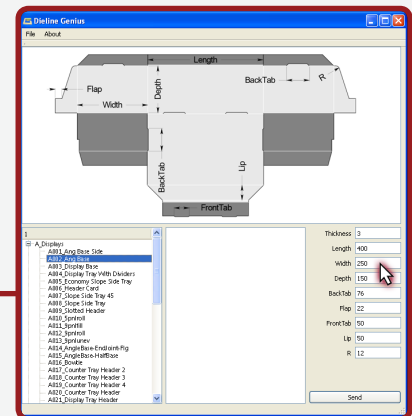

1

Preview the two dimensional design.

2

Modify the default parameters such as length, width, depth and other dimensions including material thickness as appropriate to the design.

3

Export the design as any of the following file formats:

- DXF/DWG
- EPS
- CFF2
- 2D PDF
- HPGL
- DDES2

Library extensible using AlphaCorr Rules™ and SteelRules™ precision CAD software for packaging, point-of-purchase and steel rule die design.
